Pediatric Pulmonology 8:305–306 (1990)

Subject Index to Volume 8

Accuracy, 155
Age distribution by gender, 182
Albuterol, 240
Airflow obstruction, 4
Animal models, 168
Appropriate CPAP level, 96
ARDS-pathogenesis, 104
Arterial Sa_{O_2}, 259

Bacterial lipopolysaccharide stimulation, 178
Blood gases, peak inspiratory, mean airway pressure, ventilator rate, effects on, 245
Book Reviews, 62, 130, 214, 298
Breathing movements, nasal airflow, respiratory inductance plethysmography, 259
Bronchial hyperactivity, 4
Bronchodilator response, 12
Bronchopulmonary dysplasia, 74, 226

Canine, 168
Carbachol challenge, 280
0.5% cell frequency, 40
Chloral hydrate, 289
Compliance & conductance of respiratory system, 289
Controlled dosage by inspired gas volume, 263
Correspondence, 61, 126, 212
Cultures for aerobic and anaerobic bacteria, 268
Cystic fibrosis, 4, 12

Difficulties with long-term recordings, 162
Digital correction, 203
Discriminant analysis, 23
Disodium cromoglycate, 240
Dose-response curves, 280
Dynamic compliance, 254
Dynamic lung compliance, 222
Dynamic pulmonary compliance, 89

Early expiratory braking, 96
ECG, 259
Effect of birthweight, 33
Effect of disease severity, 16
Effect of growth failure, 155
Effect of initial function on functional growth, 145
End-expiratory lung volume, dynamic elevation of, 273
Esophageal pressure, 259
Exercise-induced asthma, 240
Expired CO_2%, 259

FEV_1, FEF_{25-75}, 263
FEV_1, FEV_1/FVC, 145
Feline, 168
Fetus, 40
Fiberoptic laryngoscopy, 58
Five annual testings in two cohorts, 172
Flow-volume spirometry, 226
Forced oscillation technique score, 280
Functional residual capacity, 233

General vs. university hospital, 182
Gram stain, 268

Healthy infants, < 2kg vs. > 2kg weight, 254
Heart rate, 233
Home monitoring, 29
0.4–2 Hz breathing frequency, 23

IMV-standard pressure preset infant ventilator, 222
Infants with hyaline membrane disease, 222
Intermittent mandatory ventilation, combination with, 245
Intubated, mechanically ventilated infants, 268
Isolation, serum antibodies, 182

Jackknife procedure, 172

Kendall's coefficient of concordance, 172

Laryngeal braking, respiratory muscle control, 273
Late effects, 226
Least mean square analysis by computer, 89
Leporine, 168
Limits of tc usefulness, 162
Lithium, 82
Lower respiratory infection, 268
Lung biopsy, 268
Lung development, 74
Lung growth, 74
Lung histopathology, lung infection, 104
Lung volumes, 16, 226

M. pneumoniae, 182
Macrophage migration, 138
Maximal exercise test, 240
Maximum flows, 16, 172
Maximum mouth pressures, 172
Maximum pressures, 16
Mean arterial pressure, 233
Mean bias calculation, 162
Mechanical models, 168
Mechanical ventilation, 74
Minute ventilation, 240, 254
Mixed infections, 182
Multiple occlusion technique, 155
Multiple regression analysis, 12

N-acetyl-β-glucosaminidase determination, 138
Nebulized salbutamol, 289
Nebulized saline, 289
Neonatal lung disease, 226
19–20 weeks GA, 40
Non-interchangeability of methods, 273
Non-specific esterase, 138

Obstructive lung disease, 12
Organ culture, 138
Oximetry, 29

Passive & forced expiatory flow-volume curves, 289
PB time, longest PB episode, 33
Perspectives, 2, 71, 137, 221
Phagocytic index, 138
Phrenic nerve pacing, 29
Polygraphic recordings, 29
Polymorphonuclear cells, 104
Premature inspiratory interruption, 96
Prematurity, 226
Pressure-volume and tidal flow-volume relationships, 89
Preterm birth, 74
Pulmonary artery to aortic size ratio, 155
Pulmonary function, 226
Pulmonary functions, 82

© 1990 Wiley-Liss, Inc.

Pulmonary gas exchange, 240
Pulmonary resistance, 89, 222, 233
Pulse oximeter, transcutaneous P_{O_2}, 259

Randomly allocated cross-over assessment, 263
RAST tests, 12
Recombinant interferon-gamma, 178
Reference values for significant changes, 16
Regional differences, 233
Reproducibility, 155
Resistive work of breathing, 89, 254
Respiratory distress syndrome, pulmonary hypertension, meconium aspiration syndrome, 245
Respiratory rate, 254
Respiratory rate, expiratory time, 96
Respiratory system resistance, reactance, 280
Roentgenography, febrile days, sedimentation rate, blood eosinophils, 182

Scanning and transmission electron microscopy, 40
Selected Abstracts, 64, 132, 216, 299
Sensitivity index, 280
Serum concentrations, 82
Simian, 168
Smooth muscle muscarinic receptors, 233
Smoothing spline, growth velocity, 145
Somatization, 58
Specific airway conductance, 226
Specific airway resistance, 23
Spirometry, 16
Standard error of Tau, 172
Static and dynamic lung volumes, 172
Stridor, 58
Superoxide anion production, 178
Sweat electrolytes, 82

Testing for side effects, 82
Thermal time constant, effects of frequency, fan in box, copperwool in box, 203
Thoracic gas volume, 23, 289
Threshold concentration, 280
Thymidine labeling, 138
Tidal volume peak flowrates, 222
Total lung resistance, 254
Transcutaneous P_{CO_2}, 259
Transcutaneous vs arterial agreement, 162

Values related to gestational and postnatal age, 89
Ventilatory anaerobic threshold, 240

Weight and age at recording, 33
Wheezing, 58
Within-family resolution, 58
Within-subject coefficient of variation, 16

X-ray score, 12
